**Technical Service Bulletin - 021804**

To: All Dealers, Distributors, and Customers  
From: Mark Farkhan, President  
Subject: Disposal of Ride-On TPS

---

The following bulletin is in response to questions regarding the proper handling and disposal of Ride-On TPS. Please share this information with your customers and employees.

The ingredients that comprise Ride-On TPS will not adversely impact the environment if disposed of in quantities normally found in fleet applications. Ride-On TPS is biodegradable, non-hazardous, and non-flammable. Ride-On TPS is more than 95% soluble in water and can easily be washed out of a tire with water. There is no chemical bonding or reaction between Ride-On TPS and the tire.

Ride-On TPS contains Ethylene Glycol, and good industrial hygienic work practices should be used when installing or removing Ride-On. Ethylene Glycol is not a chemical listed on the RCRA Hazardous waste list, and is not considered hazardous waste by the United States EPA. Please refer to your State, local or municipal regulatory agency for any requirements of disposal of glycol based products.

Copies of the Material Safety Data Sheet (MSDS) are available upon request. For product information and general questions, please call 703-421-9778 (U.S. Toll-free: 1-800-946-6839). In case of an emergency or large spill please call 1-800-255-3924.
