Subject: Ride-On Tire Protection System

Dear Mark:

Rockville Harley-Davidson & Battley Cycles is a dealer of Harley Davidson, Ducati, Buell, Yamaha, BMW, and Bimota motorcycles. We have been in business since 1986 and have earned a reputation and trust of our customers by providing straightforward answers and recommending products that we truly believe in.

Before recommending Ride-On TPS to any of our customers, our mechanics and I personally tested the product. We found your product to be very effective at sealing punctures, and to have no effect on a bike's ride and handling. I personally tested the product in my 1995 Triumph Speed Triple for more than 5,000 miles and noticed no adverse handling effects even at high speeds. We also were very concerned with corrosion issues since all of the sealants that we had tried in the past had detrimental effects on the wheels. After more than two years of installing your product, we have found no problems with corrosion in any steel, aluminum or alloy wheels.

We have been selling Ride-On TPS since August of 1999 and install it in virtually all new motorcycles. We also sell the product in our service department to walk-in customers and existing customers that bring their bike in for service. Our customers include individual bike owners and enthusiasts as well as professional riders. We install Ride-On TPS in Montgomery County's FLHTP Police Harley Davidsons.

Based on our experience, I would not hesitate to recommend Ride-On TPS to any dealer that is looking to add a great profit center to their parts and service departments, while at the same time offering a safety product of value for their customers.

Thank you for your great customer service and technical support anytime we have needed it.

Sincerely,

Y.T. Lechner
