Dear Silvester,

I have been in the automotive industry for nearly 22 years. We have nearly 1,150 vehicle of all sizes and shapes, many of which travel on or off the road. Over the years, I have heard many sales pitches and seen many so called tire sealant claiming to be the number one tire sealant in the world, including the one, which has been in the market for 29 years. I have tried many brands and spent many valuable hours testing them.

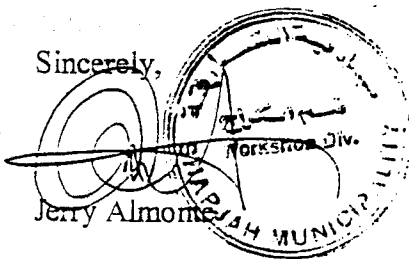

When you first approached us in July of 1997, I was very negative and hesitant to try your product. After reviewing your documents and receiving your guarantee incase of any tire or rime damage, we finally agreed to a trial test in September of same year. For the test, we used a large tire, which was used on a shovel. The tire had a half an inch hole and was patched-up with rubber, but still was losing air. It took exactly twenty minutes, after installing your product in the tire, for us to realize that Ride-On was really a great product.

Since then, we have implemented Ride-on into our system and now install it with every new tire. I am happy to say that Ride-On has improved our operation drastically, and we are enjoying all the benefits of Ride-On as you advertise. Thanks to Ride-On, we now have fewer punctures, less down time, and have increased our tire life and tire performance, all of which resulting in big savings.

I am happy to say, that we have recommend Ride-On to other Municipalities in the Northern Emirates, in particular Ajman, Ras Al Khaimah, and Fujairah, and they are currently running their own testing of the product.

I would like to thank you for introducing Ride-On to us and wish you great success in introducing Ride-On to the rest of the region.

Sincerely,

Jerry Almonte
